SUMMARY

UI/UX designer with a strong frontend development background, focused on creating clean, intuitive, and user-centered digital experiences. Experienced in user flows, wireframing, information architecture, prototyping, visual hierarchy, and responsive interface design using Figma and modern frontend technologies. Combines design thinking with development knowledge to create practical, implementation-ready interfaces. Led graphic design initiatives for E-Cell and CSBSSA at college.

TECHNICAL SKILLS

UI/UX:	Figma, Framer, Lovable, Adobe XD, Wireframing, Prototyping, User Flows, Information Architecture
Graphic Design:	Figma, Adobe Illustrator, Adobe Photoshop, Adobe After Effects, Canva
Design:	Visual Hierarchy, Responsive Design, Design Systems, Interaction Design, Usability, User-Centered Design
Programming:	HTML5, CSS3, JavaScript, Python
Frontend:	React.js, Next.js, Tailwind CSS
Backend:	Node.js, REST APIs

PROJECTS

Note Pilot **note-pilotai.vercel.app**

- Designed a clinical documentation workflow covering **5 key stages**: consultation recording, transcription, AI generation, review, and editing, focusing on reducing cognitive load for time-sensitive users.
- Created structured information hierarchy and progressive disclosure for consultation data, with interface iterations reviewed and refined through feedback from project teammates.
- Built the responsive interface using **Next.js, React, and TypeScript**, integrating Gemini-powered SOAP generation and real-time transcription into the designed workflow.

VOX-AI **vox-ai-nu.vercel.app**

- Designed an AI debate-analysis dashboard organized across **5 information areas**: summary, topics, sentiment, speaker insights, and transcript.
- Used visual hierarchy and progressive disclosure to transform long, unstructured discussions into scannable insights, with interface iterations reviewed within the project team.
- Developed the responsive interface using **Next.js and Gemini API**, supporting automated analysis of debate transcripts across multiple insight categories.

DeployZen **deploy-zen-five.vercel.app**

- Designed a **5-step ML deployment workflow** covering model upload, configuration, review, deployment, and status tracking to simplify a technically complex process.
- Designed clear system states and actionable error feedback, with workflow iterations evaluated through team reviews to improve clarity and consistency.
- Built the responsive interface using **Next.js** and integrated **ONNX Runtime**, achieving model inference in under **3 seconds** during project testing.

EDUCATION

Kolhapur Institute of Technology's College of Engineering *Aug 2023 – Aug 2027*
Bachelor of Technology – Computer Science and Business Systems
CGPA: 8.6

ACHIEVEMENTS

- **2nd Runner-Up – National Hackathon** at Chandigarh University. Competed at the national level against engineering teams across India.
- **3× Project Based Learning (PBL) Winner** – KIT's College of Engineering. Won the institute-level PBL competition three times, recognised for innovative and technically strong project execution.

EXTRA CO-CURRICULAR ACTIVITIES

- **Graphic Design Lead** – E-Cell & CSBSSA, KIT's College of Engineering. Led branding, social media creatives, promotional campaigns, and event design operations for college-level entrepreneurship and departmental activities.
